

## User Manual

When you open up the project you need to run it first by clicking the start button

after running it this window on your screen will pop up.

A screenshot of a web application window titled 'Recipe Application'. The window has a standard Windows-style title bar with minimize, maximize, and close buttons. The application content is organized into sections. The first section is 'Recipe Name:' followed by a text input field. The next section is 'Ingredients', which contains three input fields labeled 'Ingredient Name:', 'Quantity:', and 'Unit:'. Below these fields is a button labeled 'Add Ingredient'. The following section is 'Steps', which contains one input field labeled 'Step Description:' and a button labeled 'Add Step'. At the bottom of the window, there are two large buttons: 'Add Recipe' on the left and 'Clear All' on the right.

Then you would need to enter the name of the recipe, the name of the ingredient, Quantity of the ingredient, After doing all that you can click the button located under the textbox of the unit of ingredient to save the ingredients to the recipe.

Then you would need to add the steps to the recipe, so you will write the descriptions of the step then add them to the recipe by clicking the add step button.

You can then click the add recipe button to save the recipe to the List

User also have the option to clear all the recipes that have been saved before.
